Education

Northeastern University

Ph.D. in Computer Science

• Advisor: Christo Wilson | GPA: 3.9/4.0

Boston, MA

Sep 2016 - 2021 (Expected)

Beijing University of Posts and Telecommunications

B.B.A. in Management Information Systems

• Rank: 1/46 | GPA: 92.5/100

Beijing, China

Sep 2012 - Jul 2016

Experience

Google

Software Engineering Intern @ Fact Check Team, Google AI

• Research on structured understanding of fact-check articles.

New York, NY

Jun 2019 - Aug 2019

Dataminr

Research Intern @ AI and Data Science Team

- Research on crisis sub-events detection for emergency management;
- Applied NLP methods on the Twitter firehose, e.g., BERT as a service for sentence embedding, dependency parsing and tree traversal;
- A paper published at AI for social good workshop, i.e., [AISG@ICML](#).

New York, NY

Feb 2019 - Apr 2019

Northeastern University

Research Assistant @ Khoury College of Computer Sciences

- Research on computational social science, misinformation and fact-checking, algorithmic bias and accountability;
- Utilized Spark/Hadoop frameworks to build analytical pipelines for TB-sized datasets;
- Applied statistical and causal models, mixed with machine learning flavors, for hypothesis testing on observational data;
- Papers published at top-tier web and HCI conferences, e.g., [WWW](#), [ICWSM](#), [CSCW](#), [FAT*](#).

Boston, MA

Sep 2016 - Present

National University of Singapore

Research Assistant @ School of Computing

- Research on economic modeling of bitcoin mining under risk aversion.

Singapore

Dec 2015 - May 2016

Beijing University of Posts and Telecommunications

Research Assistant @ State Key Lab of Networking and Switching Technology

- Research on game-theoretic modeling of overlay networks and traffic engineering;
- Papers published at network and system conferences, e.g., [GlobeCom](#), [LCN](#), [ICPADS](#).

Beijing, China

Oct 2013 - Dec 2015

Publications

Bias Misperceived: The Role of Partisanship and Misinformation in YouTube Comment Moderation

[Shan Jiang](#), Ronald E Robertson, and Christo Wilson

[ICWSM'19](#)

Crisis Sub-Events on Social Media: A Case Study of Wildfires

[Shan Jiang](#), William Groves, Sam Anzaroot, and Alejandro Jaimes

[AISG@ICML'19](#)

oral presentation: 23.1%

Auditing Autocomplete: Suggestion Networks and Recursive Algorithm Interrogation

Ronald E Robertson, [Shan Jiang](#), David Lazer, and Christo Wilson

[WebSci'19](#)

Auditing the Partisanship of Google Search Snippets

Desheng Hu, [Shan Jiang](#), Ronald E Robertson, and Christo Wilson

[WWW'19](#)

acceptance rate: 18.0%

Who's the Guinea Pig? Investigating Online A/B/n Tests in-the-Wild

[Shan Jiang](#), John Martin, and Christo Wilson

[FAT*19](#)

acceptance rate: 24.1%

Linguistic Signals under Misinformation and Fact-Checking: Evidence from User Comments on Social Media

[Shan Jiang](#), and Christo Wilson

[CSCW'18a](#)

acceptance rate: 25.6%

Auditing Partisan Audience Bias within Google Search

Ronald E Robertson, [Shan Jiang](#), Kenneth Joseph, Lisa Friedland, David Lazer, and Christo Wilson

[CSCW'18b](#)

honorable mention | acceptance rate: 25.6%

On Ridesharing Competition and Accessibility: Evidence from Uber, Lyft, and Taxi

[Shan Jiang](#), Le Chen, Alan Mislove, and Christo Wilson

[WWW'18](#)

acceptance rate: 14.8%

Conflicts in Overlay Environments: Inefficient Equilibrium and Incentive Mechanism

Jianxin Liao, Jun Gong, [Shan Jiang](#), Tonghong Li, and Jingyu Wang

[KSII-TIIS'16](#)

Interactions of Overlays and Traffic Engineering: Equilibrium and Cooperation without Payment

Shan Jiang, Jun Gong, Jingyu Wang, Jianxin Liao, and Tonghong Li

GlobeCom'15

acceptance rate: 35.0%

Competitive Equilibrium and Stable Coalition in Overlay Environments

Shan Jiang, Jianxin Liao, Jun Gong, Jingyu Wang, and Tonghong Li

LCN'15

acceptance rate: 30.3%

Combination Feature for Image Retrieval in the Distributed Datacenter

Di Yang, Jianxin Liao, Qi Qi, Jingyu Wang, Haifeng Sun, and Shan Jiang

ICPADS'14

acceptance rate: 29.8%

Selected Projects

Crisis Sub-Events Detection for Emergency Management

Feb 2019 - Present

Sub-events detection, e.g., building collapsed, road closed, after major events, e.g., wildfire.

- Filtered Twitter firehose using SQL queries and collected Tweets on major crisis events, e.g., wildfires, hurricanes;
- Parsed Tweets to dependency trees and traversed trees to extract connected noun-verb pairs as sub-events, e.g., building collapsed;
- Used BERT as a service to generate sentence embedding and clustered sub-events of similar semantic meanings;
- Mapped Tweets with sub-events and studied the temporal cascading of sub-events.
- A paper published at AISG@ICML'19.

Is YouTube's Content Moderation Biased, or Not?

Jan 2018 - Mar 2019

The claim of content moderation being biased against conservatives is but a misperception from correlation to causation.

- Built a dataset of the ecosystem surrounding YouTube, including video veracity, political leaning, user engagement for 80K+ comments;
- Performed statistical tests to show the difference in moderation likelihood for user comments under left- and right- leaning videos;
- Used a causal model (propensity score matching) to show that above difference is not caused by political leaning but other confounders;
- Simulated model dynamics under a variety of hypotheses for robustness checks;
- A paper published at ICWSM'19.

How do "Fake News" and Fact-Checking Affect People?

Nov 2017 - Nov 2018

Social media users use more emojis and swear words under misinformation. Fact-checking has both corrective and "backfire" effects.

- Collected 5K+ fact-check articles from Snopes and PolitiFact, and 2M+ comments from Facebook, Twitter and YouTube;
- Built a topical lexicon ComLex using a hybrid method of unsupervised learning (word2vec, spectral clustering) and human evaluation;
- Performed statistical tests to show different word usage in user comments for truthful/fake news and before/after fact-check;
- Built predictive models to show that such difference in user comments can help with fake news detection;
- A paper published at CSCW'18a.

Do Google's Search Engine Result Pages Have Partisan Bias?

Sep 2016 - Nov 2018

Search results show consistent bias with input queries, and no significant evidence for "filter bubbles" on political ideology.

- Recruited 200+ participants to install browser extensions that enabled us to collect search data from their computers;
- Calculated partisan bias score based on a dataset of 100M+ Tweets using Apache Spark;
- Performed statistical tests to show the correlation between partisan bias and rankings in Google's search engine result pages;
- A paper published at CSCW'18b, a visualization system available at polarshare.shanjiang.me.

Are Ridesharing Services Equally Accessible?

Sep 2016 - Apr 2018

The quality of Uber and Lyft's services worsen in high-diversity areas in San Francisco and low-income areas in New York City.

- Intercepted Uber and Lyft's mobile traffic using man-in-the-middle (MITM) proxy and built structured requests for data collection;
- Implemented crawlers to collect driver's trajectory data from Uber and Lyft in San Francisco and New York City for 2 months;
- Analyzed 10TB+ data using Apache Spark to discover spatio-temporal patterns of ridesharing services;
- Used a spatial econometric model to show the inequality of ridesharing accessibility;
- A paper published at WWW'18, a report published by SFCTA, a visualization system available at tncstoday.sfcta.org.

Honors and Awards

Honorable Mention	for top 2.7% (30/1,106) papers at CSCW, awarded for CSCW'18b	2018
Graduate Fellowship	for first-year Ph.D. students at Northeastern University	2016-2017
Outstanding Undergraduates	for top undergraduate students in the city of Beijing	2016
National Scholarship	for top 1% students at Beijing University of Posts and Telecommunications	2014-2015
First-Class Scholarship ×2	for top 1% students at Beijing University of Posts and Telecommunications	2013-2014, 2015-2016

Skills

Languages	Python, Java, C/C++, R, Matlab, SQL, HTML/CSS, JavaScript
Platforms	Apache Spark, Apache Hadoop, TensorFlow, PyTorch, Vega/Vega Lite
