Education

Northeastern University

Ph.D. in Computer Science

- Advisor: Christo Wilson

Boston, MA

Sep 2016 - 2021 (Expected)

Beijing University of Posts and Telecommunications

B.B.A. in Management Information Systems

- Rank: 1/46 GPA: 92.5/100

Beijing, China

Sep 2012 - Jul 2016

Experience

Facebook

Ph.D. ML Intern @ Illicit Trade Team, Dangerous Content

Seattle, WA

Jun 2020 - Sep 2020

- Project: Weak supervision and multitask learning for detecting illicit trade content.
- Implemented weak supervision on multimodal models for illicit trade (e.g., prostitution, firearms, drugs) detection by utilizing existing labels and pre-trained models of auxiliary tasks (e.g., user reporting, nudity classifier) for multitask learning.
- Proposed and tested generalizable hypotheses on selecting and ordering auxiliary tasks for weakly supervising models in other problem areas, and shared experiments and results across Facebook's machine learning teams.
- Integrated 5K+ lines of code in [production](#) and improved precision@recall=90% of production models by up to **10%**.

Google

Ph.D. SWE Intern @ Fact Check Team, Google AI

New York, NY

Jun 2019 - Aug 2019

- Project: ClaimReview markup (e.g., claim, claimant and verdict) extraction from fact-check articles.
- Explored several task formulation possibilities, e.g., language generation under encoder-decoder frameworks, and eventually formulated the task as a sequence tagging problem and conducted several experiments by modifying and fine-tuning BERT models.
- Integrated 5K+ lines of code in [production](#) with test files and technical documentation and published a paper at [WWW'20](#).

Dataminr

Research Intern @ AI and Data Science Team

New York, NY

Feb 2019 - Apr 2019

- Project: Crisis sub-event (e.g., road burning after a wildfire) identification on social media for emergency management.
- Built a pipeline model that first scans Twitter and parses each Tweet to a dependency tree, then traverses it to extract connected noun-verb pairs (e.g., home-burn, house-destroy), and finally clusters similar pairs as sub-events.
- Case-studied recorded California wildfires to understand the temporal cascading (e.g., fire→smoke→pollution) of sub-event networks.
- Published a paper at the AI for social good workshop, i.e., [AISG'19@ICML](#).

Northeastern University

Research and Teaching Assistant @ Khoury College of Computer Sciences

Boston, MA

Sep 2016 - Present

- Research areas: computational social science, algorithm auditing, misinformation, fact-checking, etc.
- Collected and analyzed TB-sized social media and news data with the Spark/Hadoop framework.
- Applied statistical (e.g., regression) and causal (e.g., propensity scoring) models for hypothesis testings.
- Leveraged empirical observations to build natural language processing and machine learning pipelines to identify misinformation and linguistic bias in human-generated content (e.g., news, comments), particularly under algorithmic curation (e.g., ranking, personalization).
- Published [award-winning](#) papers at social computing (e.g., [WWW'18/19](#), [ICWSM'19/20](#), [CSCW'18](#)) and AI (e.g., [AAAI'20](#), [FAccT'19/21](#)) venues.

National University of Singapore

Research Assistant @ School of Computing

Singapore

Dec 2015 - May 2016

- Project: Economic modeling of mining cryptocurrency (e.g., Bitcoin) behaviors under assumptions of risk aversion.

Beijing University of Posts and Telecommunications

Research Assistant @ Institute of Network Technology

Beijing, China

Oct 2013 - Dec 2015

- Project: Game-theoretic modeling of the competition and cooperation between overlay networks and traffic engineering.
- Published papers at computer networks (e.g., [GlobeCom'15](#), [LCN'15](#)) and systems (e.g., [ICPADS'14](#)) venues.

Skills

Programming Languages

Python, Java, Scala, C/C++, R, SQL, HTML/CSS, JavaScript, Bash

Tools & Platforms

Spark, Hadoop/HDFS, TensorFlow/Keras, PyTorch, Git, Linux

Deep Learning & NLP

Transformers/BERT, Seq2Seq, RNN/LSTM, Attention, Rationalization, Interpretability, Explainability

Statistics

Hypothesis Testing, Regression Analysis, Causal Inference
