Education

Northeastern University   Boston, MA
Ph.D. in Computer Science   Sep 2016 - 2021 (Expected)
- Advisor: Christo Wilson

Beijing University of Posts and Telecommunications   Beijing, China
B.B.A. in Management Information Systems   Sep 2012 - Jul 2016
- Rank: 1/46   GPA: 92.5/100

Experience

Facebook   Seattle, WA
Ph.D. ML Intern @ Illicit Trade Team, Dangerous Content   Jun 2020 - Sep 2020
- Project: Weak supervision and multitask learning for detecting illicit trade content.
- Implemented weak supervision on multimodal models for illicit trade (e.g., prostitution, firearms, drugs) detection by utilizing existing labels and pre-trained models of auxiliary tasks (e.g., user reporting, nudity classifier) for multitask learning.
- Proposed and tested generalizable hypotheses on selecting and ordering auxiliary tasks for weakly supervising models in other problem areas, and shared experiments and results across Facebook's machine learning teams.
- Improved the performance of production models by up to 2% and productionized 5K+ lines of code.

Google   New York, NY
Ph.D. SWE Intern @ Fact Check Team, Google AI   Jun 2019 - Aug 2019
- Project: ClaimReview markup (e.g., claim, claimant and verdict) extraction from fact-check articles.
- Explored several task formulation possibilities, e.g., language generation under encoder-decoder frameworks, and eventually formulated the task as a sequence tagging problem and conducted several experiments by modifying and fine-tuning BERT models.
- Productionized 5K+ lines of code with test files and technical documentation.
- Published a paper with additional data exploration and model comparison at WWW'20.

Dataminr   New York, NY
Research Intern @ AI and Data Science Team   Feb 2019 - Apr 2019
- Project: Crisis sub-event (e.g., burning road after a wildfire) detection on social media for emergency management.
- Built a pipeline model that first scans the Twitter firehose and parses Tweets to dependency trees, then traverses to extract connected noun-verb pairs (e.g., home-burn, house-destroy), and finally clusters similar pairs as sub-events.
- Case-studied California wildfires to understand the temporal cascading (e.g., fire→smoke→pollution) of sub-event networks.
- Published a paper at the AI for social good workshop, i.e., AISG'19@ICML.

Northeastern University   Boston, MA
Research and Teaching Assistant @ Khoury College of Computer Sciences   Sep 2016 - Present
- Research areas: computational journalism, computational social science, algorithm auditing, information quality.
- Collected and analyzed TB-sized social media and search engine data under the Spark/Hadoop framework.
- Applied statistical (e.g., regression) and causal (e.g., propensity score matching) models for hypothesis testing.
- Leveraged empirical observations to build natural language processing and machine learning pipelines to identify misinformation and linguistic bias in human-generated content (e.g., news, comments), particularly under algorithmic curation (e.g., ranking, personalization).
- Published award-winning papers at top web (e.g., WWW'18-19, ICWSM'19-20), HCI (e.g., CSCW'18) and AI (e.g., AAAI'20, FAT*'19) conferences.

National University of Singapore   Singapore
Research Assistant @ School of Computing   Dec 2015 - May 2016
- Project: Economic modeling of Bitcoin mining under risk aversion assumptions.

Beijing University of Posts and Telecommunications   Beijing, China
Research Assistant @ Institute of Network Technology   Oct 2013 - Dec 2015
- Project: Game-theoretic modeling of overlay networks and traffic engineering.
- Published papers at computer network and system conferences, e.g., GlobeCom'15, LCN'15, ICPADS'14.
